

Amendments to the Specification:

Please replace the paragraph beginning at page 19, paragraph [0063] with the following amended paragraph:

[0001] The mailing configuration file 714, the database parser 720 and message parser 722 operate on a predictable and logical basis—~~(Flowchart?)~~. Therefore, by knowing where e-mail transmission was interrupted, the point that existed at the time of any system crash can easily be recovered.
